Plaintiffs alleged that Zynga shared personally identifiable information with advertisers through the transmission of referrer headers that linked to **FACEBOOK** user pages—allegations that were based on an October 18, 2010, front-page *Wall Street Journal* article. Zynga argued that any leakage did not involve the “contents” of any communications under the federal privacy statutes, that any transmissions resulted from standard web-browser operations, and that plaintiffs had not alleged any actual harm. In May 2014, the U.S. Court of Appeals for the Ninth Circuit affirmed the dismissal of all claims against Zynga and the dismissal of most claims against Facebook in the parallel Facebook privacy case.
