

Team of Integrated Resources

The Tax Accounting Group (TAG) service mission is to enthusiastically provide effective solutions that exceed expectations. What allows us to fulfill our mission and maintain long-term relationships with our clients is the passion, objectivity and deep experience of our professionals. Our senior staff has an average of about 20 years working together as a team, with some having more than 30 years on our platform. We draw upon these years of experience and combine the efficient interaction between the integrated, multidisciplinary approach of our professionals to meet the needs of our clients. These professionals, who are intimately familiar with and take a personal interest in our clients' needs, work hard to justify the trust placed in us.

As the entrusted advisor to clients in nearly every state and 25 foreign countries, TAG continues to enjoy impressive growth, in large part because of our clients' continued expression of confidence and referrals. We are delighted and privileged to be the first ancillary group of Duane Morris and to maintain one of the largest tax, accounting and litigation consulting groups affiliated with any law firm in the United States. This one-of-a-kind platform allows us to deliver flexible, customized and specialized services desired by our partners and clients while providing uncommon access to other valuable resources in the legal and non-legal fields.

Selecting an advisor, whether an expert or consultant, is one of the most important decisions you will make. To meet your unique and specific needs, we invite you to evaluate our approach to exemplary service, profound sense of urgency, deep and broad proficiency and innovative ideas.
